WISYNCO Wisynco Group Limited	P/E: 14.87x P/B: 3.22x Price: \$20.52 Div Yield 1.95%	OVERWEIGHT Throughout the pandemic, Wisynco has managed to improve its operational efficiency but given the effects of COVID-19 on industries such as tourism and education, the Company was unable to deliver significant revenue growth. Now, with tourism rebounding and schools operating at a greater level, Wisynco has married its improved operational efficiency with stronger revenue growth, allowing for significant net profit growth. As tourism is expected to continue growing towards its pre-pandemic level of output, we expect Wisynco to continue to perform well. Wisynco Equity Report
JMMBGL JMMB Group Limited	P/E: 2.11x P/B: 0.69x Price: \$24.94 Div Yield 1%	OVERWEIGHT Given its relatively low P/E ratio and considering the Group's consistently strong performance throughout the pandemic, the market has been underpricing JMMBGL significantly relative to its local counterparts. JMMBGL's price has declined by 5.8% YTD which provides investors with an opportunity to acquire JMMBGL shares at a more attractive price. The long-term outlook for the company and the stock remains favorable, buoyed by an expanding regional footprint. In July JMMBGL closed on its acquisition of a commercial bank in the Dominican Republic (DR) which now enables the company to offer a full range of financial services in the market. The DR operations currently contributes 17% of net operating revenue and we will be keen to watch the effect of the expansion to JMMBGL's performance over the next few quarters. JMMB Equity Report
MASSY Massy Holdings Limited	P/E: 10.28x P/B: 1.06x Price: \$90 Div Yield 3.89%	OVERWEIGHT Massy Holdings Limited. (MHL, Massy), through its portfolio companies, engages in trading, manufacturing, distribution, and service industry businesses throughout the Caribbean region. The company operates through three portfolios: Integrated Retail, Gas Products, Motors, and Machine and two business lines: Financial Services, and Strategic and Other Investments. In financial year 2020, Massy transitioned from a Conglomerate to an Investment Holding Company. By so doing, Massy's strategy has changed, with the Group focusing mainly on its core portfolios. These core areas of the business represent Massy's competitive advantages, are well-positioned to scale, and are therefore expected to drive strategic growth going forward. Massy Equity Report

LASD Lasco Distributors	P/E: 11.14x P/B: 1.92x Price: \$5.07 Div Yield 1.97%	OVERWEIGHT Lasco Distributors has continued its growth trajectory, displaying resilience throughout the pandemic, and we expect this to continue post-pandemic supported by the improving economic backdrop of the global economy. As continued domestic demand for goods and services remain strong, the company is also looking to strengthen its exports as well as continue to launch new product lines. However, this isn't without challenges as global supply shocks has affected LASD's gross margins. In response, management has prudently managed operational costs such that higher imported inflationary costs has not completely eroded the bottom line, resulting in continued growth. Lasco Distributors Equity Report
SCIJMD/SCIUSD Sygnus Credit Investments	P/E: 10.22x / 12.01x P/B: 0.58x / 0.69x Price: \$10.81 / \$0.08 Div Yield: 6.23% / 5.39%	OVERWEIGHT Sygnus' business model is built on providing capital and direction to the underbanked, targeting the middle market. To accomplish this, the Company has executed several capital raises involving equity, preference shares and debt raise. Sygnus has demonstrated their commitment to growth and being the market leader in the regional private credit space with their acquisition of a Puerto Rico-based, private credit firm, Acrecent Financial in Q3 of their financial year. This acquisition has significantly added to the group's income and overall profitability. The stock trades at significant discount relative to peers both from a P/E perspective and a P/B perspective. At present, given Sygnus' strong current and expected future growth, the market is pricing Sygnus at a steep discount to its book value per share. Sygnus Credit Investments Equity Report
TROPICAL Tropical Battery Limited	P/E: 17.67x P/B: 2.45x Price: \$2.12 Div Yield 1.89%	OVERWEIGHT Tropical Battery has been aggressively pursuing revenue diversification strategies, to reduce its dependence on auto battery and accessory sales. This is evident by the company's recent launch of three new subsidiaries aimed at providing renewable energy solutions for commercial customers. In addition, the company recently implemented a new inventory management system that has yielded improved operational efficiencies in addition to targeted sales initiatives that have improved revenue growth. We believe that the Company will continue to grow as they build out new revenue lines, improve operational efficiencies and drive targeted sales initiatives. Tropical Battery Equity Report

PROVENJMD/ PROVENUSD Proven Group Limited	P/E: 10.72x / 11.78x P/B: 0.63x / 0.64x Price: \$20 / \$0.14 Div Yield: 4.26% / 3.89%	OVERWEIGHT Proven has shown a decline in profitability throughout the current financial year, a performance driven by lower share of earnings of associates and higher operating expenses. The company continues to demonstrate its appetite for growth through acquisitions as evidenced by the recent 100% acquisition of Fidelity Bank (Cayman). The company has a history of acquiring companies with accretive value. We expect that profit margins will improve in the future as one-off spending related to recent acquisitions pass.
LUMBER Lumber Depot Limited	P/E: 11.21x P/B: 2.87x Price: \$2.69 Div Yield 2.68%	OVERWEIGHT Lumber represents an option to gain exposure to the construction sector which has been a relatively resilient and fast-growing sector. With this sector tailwind, lumber has shown strong revenue growth since its 2019 listing and the financial year 2022 revenue and net profit are 10.1% and 26.8% higher than financial year 2021 revenue and earnings, respectively. We are still monitoring how the company progresses given the loosening of restrictions and continued growth in the construction sector. We also note that despite the growth it has shown over the last 2 years, the stock still trades at an attractive PE compared to Junior market peers. Lumber Depot Equity Report
TJH TransJamaican Highway Limited	P/E: 10.13x P/B: 5.17x Price: \$3.15 Div Yield 5.92%	OVERWEIGHT The Group continues to experience stronger-than-projected traffic growth, as evidenced by the performance during the third quarter of the 2023 financial year, and this trend is expected to persist at least in the short term. Additionally, the JIO acquisition has improved operating efficiency, and it is expected that as the group continues to reduce debt, profitability and cash flow generation will continue to improve. JBG Jamaica Broilers Group Limited	P/E: 6.65x P/B: 1.29x Price: \$31.31 Div Yield 2.75%	OVERWEIGHT JBG's financial performance has rebounded nicely from the lows seen in FY2020, driven by the recovery in the Jamaican economy and tourist arrivals, coupled with JBG's growing presence in the US market and the increasing production of the Best Dressed Chicken line of products. The loss making Haiti operation has been discontinued which should contribute to improved margins in the coming quarters. Positive results from expansion into the United States and recovery in Jamaican operations, along with stringent cost control have contributed to the surge in profitability in the first half of the 2023 financial year. Jamaica Broilers Group Equity Report
SEP Seprod Limited	P/E: 16.13x P/B: 2.02x Price: \$82.93 Div Yield 1.99%	OVERWEIGHT Seprod saw its financial performance surge for the 2022 financial year, owing to the strategic acquisition of AS Bryden, with revenues and net profit growing by 82% and 93% respectively. Going into the 2023 financial year, we expect easing of supply chain pressures, stability in commodity prices, and further consolidation of profits from AS Bryden to further lift net profits. Along with new products, Seprod also plans to aggressively target growth in export markets and is currently in the process of making necessary investments to increase capacity of its margarine plant. Seprod Limited Equity Report
LASM Lasco Manufacturing	P/E: 9.39x P/B: 1.84x Price: \$5.48 Div Yield 2.19%	OVERWEIGHT We expect that the Company's growth trajectory will be sustained, however, in the short term, the financial results have seen an impact from the overall macroeconomic conditions since the pandemic. Margins across the board have been compressed despite record profitability in 2022. Despite continued record tourism arrivals and growth in key sectors such as entertainment, steps need to be taken to restore margin progression. Against this backdrop it is notable that inflationary pressures and supply issues that plagued the company from 2022 to the first quarter of this year will likely begin to ease in the spring of 2023, suggesting a rebound in net profit growth for the company moving forward beyond FY 2023. Plans to further expand its geographical footprint by driving the contribution of export to its revenue will be value-added to the long-term sustainability of the Company's operations Lasco Manufacturing Equity Report

GK GraceKennedy Limited	P/E: 9.49x P/B: 0.93x Price: \$73.89 Div Yield 2.94%	MARKETWEIGHT For the year ended December 31, 2022, GK reported significant top-line growth, however, margin deterioration contributed to a decline in the bottom line. Revenues increased by 10.5% while profits saw a 15.1% decline of flat as operating expenses grew at a faster rate than revenues. The company cited challenges presented by high inflation globally, sustained supply chain issues, increasing interest rates, and foreign currency volatility as issues that have affected profit margins. GK continues to advance its merger & acquisition (M&A) strategy, after it increased its stake in Catherine's Peak Bottling Company Limited in the first quarter of 2023 to move its ownership stake from 35% to 70%, thus granting them a stronger position in the spring water market. The company continues to seek M&A transactions locally and internationally. These acquisitions stand to add more diversity and growth to the company's earnings. GraceKennedy Group Equity Report
MAILPAC Mailpac Group Limited	P/E: 20x P/B: 8.89x Price: \$2 Div Yield 5.5%	MARKETWEIGHT During the peak periods of the pandemic, MAILPAC benefited immensely as online shopping became a larger share of shoppers' wallets. In large part, this period of heavy demand driven by pandemic restrictions has passed and while we anticipate online shopping will remain integral for the everyday consumer, the outsized growth we witnessed in FY2020 and FY2021 will not be repeated. Admittedly, the Company has a robust balance sheet with more cash than total liabilities which we believe places MAILPAC in a position to make growth-inducing investments. However, the current slowdown in demand and consequently revenue and profit growth underscores our MARKETWEIGHT recommendation Mailpac Group Equity Report
SGJ Scotia Group Jamaica Limited	P/E: 7.61x P/B: 1.06x Price: \$41.54 Div Yield 3.25%	MARKETWEIGHT The greatest driver of profitability in FY2021 was the reduction of Expected Credit Losses (ECL) relative to the previous year as the economic backdrop improved. Scotia is not likely to have this benefit recur to the magnitude it did in FY2021. The group has made an accelerated effort to digitize its business in line with its digital strategy to drive efficiency and better service customer needs. SGJ is looking to further consolidate its operations and funnel investments in core operations through technology and talent, while also looking to enter new markets and launch new products. Scotia has two major positives. The first is that the current rising interest rate environment supports the Group's bank model, more so than other listed financial institutions. The second is that SGJ is a consistent source of relatively attractive dividends which makes the Company a good asset for investors with a clear preference for income. Scotia Group Equity Report

FTNA Fontana Limited	P/E: 17.18x P/B: 4.02x Price: \$8.76 Div Yield 2.28%	MARKETWEIGHT Fontana has been growing and expanding since listing on the junior exchange in 2019. The Company has plans to expand, which include a new outlet to bring its footprint to a total of seven locations. In its most recent quarter, Net Profit saw a 32.7% increase over the same quarter in the prior financial year. Further, the cost of sales has been impacted given the current inflationary environment and is likely to continue being affected in the near to medium term. However, the company continues to grow organically and is financially positioned to do so. Due to the current environment and increased finance costs, profitability could dampen in the near term but in the long term, the addition of its new outlet could support growth. On balance, the Company has both significant risks and the potential for upside, which underscores our recommendation. Fontana Equity Report
SVL Supreme Ventures Limited	P/E: 25.59x P/B: 14.54x Price: \$23.49 Div Yield 3.99%	MARKETWEIGHT Supreme Ventures is the market leader in the lottery and gaming industry. The company has also in recent years embarked on an aggressive growth strategy through several acquisitions (Champion Gaming and Post To Post Betting). The company would have been impacted by the pandemic as the lockdown measures impacted its operations at Caymanas Park. With the easing of restrictions, the Company should benefit from an easing of lock down restrictions and a normalization of business. Despite this, in the medium term we note that the company now has competition in the lottery segment of the market which may negatively impact margins. The degree to which this might impede the pace of revenue growth will however depend on the take up of new games such as Scratchaz which, at present, seems popular amongst younger consumers as it is a new addition to the Company's product offerings. Supreme Ventures Equity Report
ECL Express Catering Limited	P/E: 12.55x P/B: 5.18x Price: \$4 Div Yield 0%	MARKETWEIGHT ECL has seen improved performance as the tourism industry rebound, following the pandemic, has been robust. However, the Company is not currently operating at pre-covid efficiency levels, as price increases due to the current global supply chain challenges have driven higher costs across all product categories. While we do expect the tourism industry to continue to recover, driving ECL's revenues to grow and likely surpass pre-covid levels by FY2023/FY2024, the inflationary pressures can not be ignored. Longer-term we do expect the company to reap the benefits of their expanded footprint within the Sangsters International Airport as well as the return to trend growth in stopover arrivals. VMIL Victoria Mutual Investments Limited	P/E: 7.14x P/B: 1.45x Price: \$2.57 Div Yield 0%	OVERWEIGHT Victoria Mutual has recently rebranded under the "VM Group". By association, there has been implications for VMIL. For example, the Company has been significantly more active in the capital markets through its investment banking arm. We expect continued growth in the investment banking space will add considerable value to the Company's bottom line which has already shown clear improvement throughout FY2021. VMIL Equity Report

SOS Stationery & Office Supplies Limited	P/E: 13.33x P/B: 2.71x Price: \$1.6 Div Yield 1.39%	Stationery and Office Supplies presents investors with another option to benefit from the reopening of the domestic economy. A core segment of their business would have suffered from the lockdown measures and work from home, namely the sale of furniture and its SEEK line of books. However, during that period stationery sales have done well to fill that revenue gap. With the resumption of economic activity, the return to office and the expansion in the BPO sector, SOS might be a large beneficiary in 2022.
SJ Sagikor Group Jamaica Limited	P/E: 11.05x P/B: 1.59x Price: \$40.54 Div Yield 3.02%	Sagikor Group Jamaica Limited would have been adversely impacted by the pandemic even more so than the typical financial sector company due to their exposure to the tourism sector. This would have therefore led to sizeable impairment losses on their investment in associated companies (i.e., Playa Hotel and Resorts). For 2022 we therefore expect to see some amount of recovery as the group has disposed of their investments in Playa which will stem impairment losses while simultaneously still having direct exposure to travel through their US resort (The Hilton DoubleTree) while their banking services should benefit from a pickup in economic activity.

While the credit has seen some spread compression, we believe that there might be more to come. This comes as it trades slightly cheap relative to peers with the major concern as it relates to macroeconomic exposure to Caribbean government debt is likely to be improved with the Ivori transaction. In this regard, the successful closure of the acquisition means that there is potential for more spread compression. In addition to this, approaching closer to the end of the Fed hiking cycle might also limit the potential downside tailwinds on price from even more restrictive monetary policy. INTERNATIONAL DEVELOPMENTS

U.S.

Stocks break losing streak

The S&P 500 Index and most other major benchmarks managed to snap a string of three weekly losses as investors responded to the busiest week of the first-quarter earnings reporting season. As of the end of the week, analysts polled by FactSet were expecting overall earnings for the S&P 500 to have increased 3.7% in the first quarter relative to the year before, with “both the percentage of S&P 500 companies reporting positive earnings surprises and the magnitude of earnings surprises... above their 10-year averages.”

The technology-heavy Nasdaq Composite Index performed best, helped by strength in Apple and NVIDIA. Shares in Alphabet also surged late in the week following its announcement of better-than-expected first-quarter earnings along with the company's first dividend payment. Conversely, Facebook parent Meta Platforms fell sharply—at one point erasing nearly USD 200 billion in market value—after CEO Mark Zuckerberg announced plans to continue heavy spending on artificial intelligence and other new technologies.

Unclear whether bad news for growth is good news for markets

The buying continued on Tuesday, which may have been due in part to some downside surprises in economic data—interpreted as good news for markets because of the reduced pressure it implied on inflation and interest rates. S&P Global reported that its gauge of U.S. manufacturing activity fell back into contraction territory (below 50.0) in April, at 49.9, well below consensus estimates of around 52.0. S&P's gauge of services sector activity, while still indicating expansion, also missed expectations, at 50.9 versus 52.0. Thursday's bad economic news appeared to be treated as bad news, however. The Commerce Department's advance estimate showed the economy expanding at an annualized rate of 1.6% in the first quarter, well below consensus estimates of around 2.5%.

Mixed signals from Fed's preferred inflation gauge

Inflation data released Thursday also seemed to concern investors and raise worries that the U.S. might even be in danger of “stagflation,” or rising prices alongside flagging growth. The Commerce Department reported that its core (less food and energy) personal consumption expenditures (PCE) index rose at an annualized rate of 3.7% in the first quarter, more than expected and well above both the fourth quarter's 1.7% increase and the Federal Reserve's 2% long-term inflation target.

Europe

In local currency terms, the pan-European STOXX Europe 600 Index snapped a three-week losing streak and ended 1.74% higher. An easing of Middle East tensions and some encouraging corporate earnings results helped to boost sentiment. Most major stock indexes also advanced. Germany's DAX gained 2.39%, France's CAC 40 Index added 0.82%, and Italy's FTSE MIB climbed 0.97%. The UK's FTSE 100 Index climbed to fresh all-time highs, putting on 3.09%. European government bond yields hit their highest levels this year. Strong U.S. economic data increased expectations that the Federal Reserve would keep interest rates higher for longer, which could force other major central banks to follow suit. The yield on the 10-year German government bond briefly spiked above 2.6%.

ECB hawks cautious on rate cuts after June

Consumer prices in the UK grew an annual 3.2% in March, down from 3.4% in February. Although the inflation rate fell to its lowest level in two and a half years, the decline was slightly less than forecast by analysts and the Bank of England (BoE) due to elevated price growth in fuel and communication goods. Services inflation—a measure of underlying price pressures that is watched closely by the BoE—remained high but slowed to 6.0% from 6.1%.

Wage growth also slowed less than expected. Excluding bonuses, pay increased 6% year over year, down from 6.1% in the preceding period. The unemployment rate rose sharply to 4.2% in February from 3.9%. Job vacancies continued to decline in the first quarter.

ECB policymakers stick with June rate cut, but oil in focus

European Central Bank policymakers have signaled that they expect to lower interest rates in June, barring economic shocks. However, comments by hawks appeared to cast doubt on subsequent reductions in borrowing costs. German Bundesbank President Joachim Nagel said in a speech that a decision in June “would not necessarily be followed by a series of rate cuts,” given the current uncertainty. Executive Board member Isabel Schnabel highlighted that services inflation was the biggest concern. “There is a consensus emerging that we may be facing a quite bumpy last mile,” she said.

Japan

Buoyed by historic yen weakness, Japan's stock markets gained over the week, with both the Nikkei 225 Index and the broader TOPIX Index returning 2.3%. The Bank of Japan (BoJ) refrained from making changes to its monetary policy at its April meeting, which was perceived as broadly dovish by investors. BoJ Governor Kazuo Ueda hinted that confidence to raise interest rates further is set to increase in the second half of this year, however. In the fixed income markets, the yield on the 10-year Japanese government bond rose to 0.91% from the prior week's 0.84%.
