WISYNCO Wisynco Group Limited	P/E: 16.34x P/B: 2.8x Price: \$20.42 Div Yield 2.26%	OVERWEIGHT Throughout the pandemic, Wisynco has managed to improve its operational efficiency but given the effects of COVID-19 on industries such as tourism and education, the Company was unable to deliver significant revenue growth. Now, with tourism rebounding and schools operating at a greater level, Wisynco has married its improved operational efficiency with stronger revenue growth, allowing for significant net profit growth. As tourism is expected to continue growing towards its pre-pandemic level of output, we expect Wisynco to continue to perform well. Wisynco Equity Report
JMMBGL JMMB Group Limited	P/E: N/A P/B: 0.71x Price: \$20.05 Div Yield 1.25%	OVERWEIGHT Given its relatively low P/E ratio and considering the Group's consistently strong performance throughout the pandemic, the market has been underpricing JMMBGL significantly relative to its local counterparts. JMMBGL's price has declined by 5.8% YTD which provides investors with an opportunity to acquire JMMBGL shares at a more attractive price. The long-term outlook for the company and the stock remains favorable, buoyed by an expanding regional footprint. In July JMMBGL closed on its acquisition of a commercial bank in the Dominican Republic (DR) which now enables the company to offer a full range of financial services in the market. The DR operations currently contributes 17% of net operating revenue and we will be keen to watch the effect of the expansion to JMMBGL's performance over the next few quarters. JMMB Equity Report
MASSY Massy Holdings Limited	P/E: 9.04x P/B: 0.82x Price: \$76.45 Div Yield 4.76%	OVERWEIGHT Massy Holdings Limited. (MHL, Massy), through its portfolio companies, engages in trading, manufacturing, distribution, and service industry businesses throughout the Caribbean region. The company operates through three portfolios: Integrated Retail, Gas Products, Motors, and Machine and two business lines: Financial Services, and Strategic and Other Investments. In financial year 2020, Massy transitioned from a Conglomerate to an Investment Holding Company. By so doing, Massy's strategy has changed, with the Group focusing mainly on its core portfolios. These core areas of the business represent Massy's competitive advantages, are well-positioned to scale, and are therefore expected to drive strategic growth going forward. Massy Equity Report

LASD Lasco Distributors	P/E: 11.07x P/B: 1.41x Price: \$4.1 Div Yield 2.63%	OVERWEIGHT Lasco Distributors has continued its growth trajectory, displaying resilience throughout the pandemic, and we expect this to continue post-pandemic supported by the improving economic backdrop of the global economy. As continued domestic demand for goods and services remain strong, the company is also looking to strengthen its exports as well as continue to launch new product lines. However, this isn't without challenges as global supply shocks has affected LASD's gross margins. In response, management has prudently managed operational costs such that higher imported inflationary costs has not completely eroded the bottom line, resulting in continued growth. Lasco Distributors Equity Report
SCIJMD/SCIUSD Sygnus Credit Investments	P/E: 4.75x / 4.19x P/B: 0.59x / 0.52x Price: \$12.08 / \$0.07 Div Yield: 6.03% / 6.84%	OVERWEIGHT Sygnus' business model is built on providing capital and direction to the underbanked, targeting the middle market. To accomplish this, the Company has executed several capital raises involving equity, preference shares and debt raise. Sygnus has demonstrated their commitment to growth and being the market leader in the regional private credit space with their acquisition of a Puerto Rico-based, private credit firm, Acrecent Financial in Q3 of their financial year. This acquisition has significantly added to the group's income and overall profitability. The stock trades at significant discount relative to peers both from a P/E perspective and a P/B perspective. At present, given Sygnus' strong current and expected future growth, the market is pricing Sygnus at a steep discount to its book value per share. Sygnus Credit Investments Equity Report
TROPICAL Tropical Battery Limited	P/E: 106.5x P/B: 2.48x Price: \$2.13 Div Yield 0%	OVERWEIGHT Tropical Battery has been aggressively pursuing revenue diversification strategies, to reduce its dependence on auto battery and accessory sales. This is evident by the company's recent launch of three new subsidiaries aimed at providing renewable energy solutions for commercial customers. In addition, the company recently implemented a new inventory management system that has yielded improved operational efficiencies in addition to targeted sales initiatives that have improved revenue growth. We believe that the Company will continue to grow as they build out new revenue lines, improve operational efficiencies and drive targeted sales initiatives. Tropical Battery Equity Report

PROVENJMD/ PROVENUSD Proven Group Limited	P/E: N/A P/B: 0.75x / 0.69x Price: \$17.38 / \$0.11 Div Yield: 2.96% / 2.95%	OVERWEIGHT Proven has shown a decline in profitability throughout the current financial year, a performance driven by lower share of earnings of associates and higher operating expenses. The company continues to demonstrate its appetite for growth through acquisitions as evidenced by the recent 100% acquisition of Fidelity Bank (Cayman). The company has a history of acquiring companies with accretive value. We expect that profit margins will improve in the future as one-off spending related to recent acquisitions pass.
LUMBER Lumber Depot Limited	P/E: 15.21x P/B: 2.73x Price: \$2.89 Div Yield 2.42%	OVERWEIGHT Lumber represents an option to gain exposure to the construction sector which has been a relatively resilient and fast-growing sector. With this sector tailwind, lumber has shown strong revenue growth since its 2019 listing and the financial year 2022 revenue and net profit are 10.1% and 26.8% higher than financial year 2021 revenue and earnings, respectively. We are still monitoring how the company progresses given the loosening of restrictions and continued growth in the construction sector. We also note that despite the growth it has shown over the last 2 years, the stock still trades at an attractive PE compared to Junior market peers. Lumber Depot Equity Report
TJH TransJamaican Highway Limited	P/E: 8.88x P/B: 4.49x Price: \$3.67 Div Yield 5.19%	OVERWEIGHT The Group continues to experience stronger-than-projected traffic growth, as evidenced by the performance during the third quarter of the 2023 financial year, and this trend is expected to persist at least in the short term. Additionally, the JIO acquisition has improved operating efficiency, and it is expected that as the group continues to reduce debt, profitability and cash flow generation will continue to improve. JBG Jamaica Broilers Group Limited	P/E: 8.41x P/B: 1.07x Price: \$28.02 Div Yield 2.65%	OVERWEIGHT JBG's financial performance has rebounded nicely from the lows seen in FY2020, driven by the recovery in the Jamaican economy and tourist arrivals, coupled with JBG's growing presence in the US market and the increasing production of the Best Dressed Chicken line of products. The loss making Haiti operation has been discontinued which should contribute to improved margins in the coming quarters. Positive results from expansion into the United States and recovery in Jamaican operations, along with stringent cost control have contributed to the surge in profitability in the first half of the 2023 financial year. Jamaica Broilers Group Equity Report
SEP Seprod Limited	P/E: 27.34x P/B: 2x Price: \$82.3 Div Yield 2.63%	OVERWEIGHT Seprod saw its financial performance surge for the 2022 financial year, owing to the strategic acquisition of AS Bryden, with revenues and net profit growing by 82% and 93% respectively. Going into the 2023 financial year, we expect easing of supply chain pressures, stability in commodity prices, and further consolidation of profits from AS Bryden to further lift net profits. Along with new products, Seprod also plans to aggressively target growth in export markets and is currently in the process of making necessary investments to increase capacity of its margarine plant. Seprod Limited Equity Report
LASM Lasco Manufacturing	P/E: 11.4x P/B: 2.09x Price: \$7.25 Div Yield 2.06%	OVERWEIGHT We expect that the Company's growth trajectory will be sustained, however, in the short term, the financial results have seen an impact from the overall macroeconomic conditions since the pandemic. Margins across the board have been compressed despite record profitability in 2022. Despite continued record tourism arrivals and growth in key sectors such as entertainment, steps need to be taken to restore margin progression. Against this backdrop it is notable that inflationary pressures and supply issues that plagued the company from 2022 to the first quarter of this year will likely begin to ease in the spring of 2023, suggesting a rebound in net profit growth for the company moving forward beyond FY 2023. Plans to further expand its geographical footprint by driving the contribution of export to its revenue will be value-added to the long-term sustainability of the Company's operations Lasco Manufacturing Equity Report

GK GraceKennedy Limited	P/E: 8.46x P/B: 0.76x Price: \$71.94 Div Yield 3.28%	MARKETWEIGHT For the year ended December 31, 2022, GK reported significant top-line growth, however, margin deterioration contributed to a decline in the bottom line. Revenues increased by 10.5% while profits saw a 15.1% decline of flat as operating expenses grew at a faster rate than revenues. The company cited challenges presented by high inflation globally, sustained supply chain issues, increasing interest rates, and foreign currency volatility as issues that have affected profit margins. GK continues to advance its merger & acquisition (M&A) strategy, after it increased its stake in Catherine's Peak Bottling Company Limited in the first quarter of 2023 to move its ownership stake from 35% to 70%, thus granting them a stronger position in the spring water market. The company continues to seek M&A transactions locally and internationally. These acquisitions stand to add more diversity and growth to the company's earnings. GraceKennedy Group Equity Report
MAILPAC Mailpac Group Limited	P/E: 22.73x P/B: 7.75x Price: \$2.5 Div Yield 0%	MARKETWEIGHT During the peak periods of the pandemic, MAILPAC benefited immensely as online shopping became a larger share of shoppers' wallets. In large part, this period of heavy demand driven by pandemic restrictions has passed and while we anticipate online shopping will remain integral for the everyday consumer, the outsized growth we witnessed in FY2020 and FY2021 will not be repeated. Admittedly, the Company has a robust balance sheet with more cash than total liabilities which we believe places MAILPAC in a position to make growth-inducing investments. However, the current slowdown in demand and consequently revenue and profit growth underscores our MARKETWEIGHT recommendation Mailpac Group Equity Report
SGJ Scotia Group Jamaica Limited	P/E: 8.2x P/B: 1.16x Price: \$56.01 Div Yield 3.04%	MARKETWEIGHT The greatest driver of profitability in FY2021 was the reduction of Expected Credit Losses (ECL) relative to the previous year as the economic backdrop improved. Scotia is not likely to have this benefit recur to the magnitude it did in FY2021. The group has made an accelerated effort to digitize its business in line with its digital strategy to drive efficiency and better service customer needs. SGJ is looking to further consolidate its operations and funnel investments in core operations through technology and talent, while also looking to enter new markets and launch new products. Scotia has two major positives. The first is that the current rising interest rate environment supports the Group's bank model, more so than other listed financial institutions. The second is that SGJ is a consistent source of relatively attractive dividends which makes the Company a good asset for investors with a clear preference for income. Scotia Group Equity Report

FTNA Fontana Limited	P/E: 19.65x P/B: 3.66x Price: \$9.04 Div Yield 2.77%	MARKETWEIGHT Fontana has been growing and expanding since listing on the junior exchange in 2019. The Company has plans to expand, which include a new outlet to bring its footprint to a total of seven locations. In its most recent quarter, Net Profit saw a 32.7% increase over the same quarter in the prior financial year. Further, the cost of sales has been impacted given the current inflationary environment and is likely to continue being affected in the near to medium term. However, the company continues to grow organically and is financially positioned to do so. Due to the current environment and increased finance costs, profitability could dampen in the near term but in the long term, the addition of its new outlet could support growth. On balance, the Company has both significant risks and the potential for upside, which underscores our recommendation. Fontana Equity Report
SVL Supreme Ventures Limited	P/E: 33.79x P/B: 8.62x Price: \$18.63 Div Yield 3.11%	MARKETWEIGHT Supreme Ventures is the market leader in the lottery and gaming industry. The company has also in recent years embarked on an aggressive growth strategy through several acquisitions (Champion Gaming and Post To Post Betting). The company would have been impacted by the pandemic as the lockdown measures impacted its operations at Caymanas Park. With the easing of restrictions, the Company should benefit from an easing of lock down restrictions and a normalization of business. Despite this, in the medium term we note that the company now has competition in the lottery segment of the market which may negatively impact margins. The degree to which this might impede the pace of revenue growth will however depend on the take up of new games such as Scratchaz which, at present, seems popular amongst younger consumers as it is a new addition to the Company's product offerings. Supreme Ventures Equity Report
ECL Express Catering Limited	P/E: 10.82x P/B: 2.93x Price: \$2.75 Div Yield 3.54%	MARKETWEIGHT ECL has seen improved performance as the tourism industry rebound, following the pandemic, has been robust. However, the Company is not currently operating at pre-covid efficiency levels, as price increases due to the current global supply chain challenges have driven higher costs across all product categories. While we do expect the tourism industry to continue to recover, driving ECL's revenues to grow and likely surpass pre-covid levels by FY2023/FY2024, the inflationary pressures can not be ignored. Longer-term we do expect the company to reap the benefits of their expanded footprint within the Sangsters International Airport as well as the return to trend growth in stopover arrivals. SOS Stationery & Office Supplies Limited	P/E: 16.11x P/B: 2.01x Price: \$1.45 Div Yield 0%	Stationery and Office Supplies presents investors with another option to benefit from the reopening of the domestic economy. A core segment of their business would have suffered from the lockdown measures and work from home, namely the sale of furniture and its SEEK line of books. However, during that period stationery sales have done well to fill that revenue gap. With the resumption of economic activity, the return to office and the expansion in the BPO sector, SOS might be a large beneficiary in 2022.
SJ Sagikor Group Jamaica Limited	P/E: 13.73x P/B: 1.58x Price: \$42.98 Div Yield 3.19%	Sagikor Group Jamaica Limited would have been adversely impacted by the pandemic even more so than the typical financial sector company due to their exposure to the tourism sector. This would have therefore led to sizeable impairment losses on their investment in associated companies (i.e., Playa Hotel and Resorts). For 2022 we therefore expect to see some amount of recovery as the group has disposed of their investments in Playa which will stem impairment losses while simultaneously still having direct exposure to travel through their US resort (The Hilton DoubleTree) while their banking services should benefit from a pickup in economic activity.

While the credit has seen some spread compression, we believe that there might be more to come. This comes as it trades slightly cheap relative to peers with the major concern as it relates to macroeconomic exposure to Caribbean government debt is likely to be improved with the Ivori transaction. In this regard, the successful closure of the acquisition means that there is potential for more spread compression. In addition to this, approaching closer to the end of the Fed hiking cycle might also limit the potential downside tailwinds on price from even more restrictive monetary policy. INTERNATIONAL DEVELOPMENTS

U.S.

Stocks decline amid Treasury market volatility and renewed tariff threats

Major stock indexes finished the week lower. Small- and mid-cap indexes fared worst, while the S&P 500 Index and Dow Jones Industrial Average both fell back into negative territory for the year after ending the prior week slightly positive. The technology-heavy Nasdaq Composite held up best but still shed 2.47%. U.S. markets will be closed Monday in observance of the Memorial Day holiday.

After a relatively quiet start to the week, stock indexes took a sharp turn lower on Wednesday afternoon, alongside U.S. Treasuries, following a weaker-than-expected auction of 20-year Treasury bonds, which pushed longer-term yields higher and saw the 30-year yield hit its highest level since 2023, though Treasuries across most maturities recovered some ground by the end of the week.

Business activity rebounds in May

After hitting a 16-month low in April, U.S. business activity growth rebounded in May, according to S&P Global's Flash Purchasing Managers' Index (PMI) survey data. Activity in the services sector improved from a 17-month low in April, jumping from a PMI reading of 50.8 to 52.3 in May (readings above 50 signal expansion, while readings below 50 indicate contraction). The Manufacturing PMI also improved, increasing from 50.2 in April to a 3-month high of 52.3 in May. Both readings were better than consensus estimates.

April existing home sales hit lowest level since 2009; new home sales unexpectedly rise

Elsewhere, the National Association of Realtors (NAR) reported that existing home sales unexpectedly fell to a seasonally adjusted annual rate of 4 million in April, down 0.5% from March and the lowest April reading since 2009, while the median sales price rose to \$414,000, the 22nd consecutive month of year-over-year price increases.

In other housing market news, the Census Bureau reported Friday morning that new home sales jumped to a seasonally adjusted annual rate of 743,000 in April, up from March's reading of 670,000 and well ahead of consensus estimates for 690,000.

Europe

In local currency terms, the pan-European STOXX Europe 600 Index ended 0.75% lower, snapping five weeks of gains, after U.S. President Donald Trump said he would recommend a 50% tariff on goods from the European Union. Major stock indexes also declined. Germany's DAX fell 0.58%, France's CAC 40 Index dropped 1.93%, and Italy's FTSE MIB lost 2.90%. The UK's FTSE 100 Index, however, gained 0.38%.

Eurozone PMI unexpectedly falls; EC cuts forecasts

Business activity in the euro area unexpectedly contracted in May, as the service sector experienced a sharp deterioration, according to purchasing managers' surveys compiled by S&P Global. The HCOB Eurozone Composite PMI fell to 49.5 from 50.4 in April, according to a preliminary estimate. (PMI readings below 50 indicate a contraction.) Business activity shrank in Germany, while French output shrank for a ninth consecutive month.

German 1Q growth revised sharply higher

The German economy expanded in the first quarter by 0.4% sequentially, double the initial estimate and a rebound from the 0.2% contraction it registered in the final three months of last year. Stronger household consumption, fixed investments, and net trade drove the fastest pickup in German economic growth since the third quarter of 2022.

Japan

Japan's stock markets posted losses over the week, with the Nikkei 225 Index falling 1.57% and the broader TOPIX Index down 0.18%, as markets increased bets on more monetary policy tightening by the Bank of Japan following hotter inflation data. Meanwhile, lead trade negotiator Ryosei Akazawa reportedly reiterated the government's position in lobbying the U.S. for broader tariff exemptions as he prepared to leave for Washington for a third round of trade talks.

China

Mainland Chinese stock markets declined as attention turned back to the economy after Beijing and Washington struck a temporary trade truce. The onshore benchmark CSI 300 Index shed 0.18% and the Shanghai Composite Index eased 0.57% in local currency terms, according to FactSet. In Hong Kong, the benchmark Hang Seng Index added 1.10%.
