WISYNCO Wisynco Group Limited	P/E: 16.01x P/B: 2.74x Price: \$20.01 Div Yield 2.3%	OVERWEIGHT Throughout the pandemic, Wisynco has managed to improve its operational efficiency but given the effects of COVID-19 on industries such as tourism and education, the Company was unable to deliver significant revenue growth. Now, with tourism rebounding and schools operating at a greater level, Wisynco has married its improved operational efficiency with stronger revenue growth, allowing for significant net profit growth. As tourism is expected to continue growing towards its pre-pandemic level of output, we expect Wisynco to continue to perform well. Wisynco Equity Report
JMMBGL JMMB Group Limited	P/E: 10.86x P/B: 0.69x Price: \$19.55 Div Yield 1.28%	OVERWEIGHT Given its relatively low P/E ratio and considering the Group's consistently strong performance throughout the pandemic, the market has been underpricing JMMBGL significantly relative to its local counterparts. JMMBGL's price has declined by 5.8% YTD which provides investors with an opportunity to acquire JMMBGL shares at a more attractive price. The long-term outlook for the company and the stock remains favorable, buoyed by an expanding regional footprint. In July JMMBGL closed on its acquisition of a commercial bank in the Dominican Republic (DR) which now enables the company to offer a full range of financial services in the market. The DR operations currently contributes 17% of net operating revenue and we will be keen to watch the effect of the expansion to JMMBGL's performance over the next few quarters. JMMB Equity Report
MASSY Massy Holdings Limited	P/E: 9.11x P/B: 0.83x Price: \$77 Div Yield 4.73%	OVERWEIGHT Massy Holdings Limited. (MHL, Massy), through its portfolio companies, engages in trading, manufacturing, distribution, and service industry businesses throughout the Caribbean region. The company operates through three portfolios: Integrated Retail, Gas Products, Motors, and Machine and two business lines: Financial Services, and Strategic and Other Investments. In financial year 2020, Massy transitioned from a Conglomerate to an Investment Holding Company. By so doing, Massy's strategy has changed, with the Group focusing mainly on its core portfolios. These core areas of the business represent Massy's competitive advantages, are well-positioned to scale, and are therefore expected to drive strategic growth going forward. Massy Equity Report

LASD Lasco Distributors	P/E: 9.43x P/B: 1.2x Price: \$3.58 Div Yield 3.09%	OVERWEIGHT Lasco Distributors has continued its growth trajectory, displaying resilience throughout the pandemic, and we expect this to continue post-pandemic supported by the improving economic backdrop of the global economy. As continued domestic demand for goods and services remain strong, the company is also looking to strengthen its exports as well as continue to launch new product lines. However, this isn't without challenges as global supply shocks has affected LASD's gross margins. In response, management has prudently managed operational costs such that higher imported inflationary costs has not completely eroded the bottom line, resulting in continued growth. Lasco Distributors Equity Report
SCIJMD/SCIUSD Sygnus Credit Investments	P/E: 5.13x / 4.64x P/B: 0.64x / 0.58x Price: \$13.04 / \$0.07 Div Yield: 5.58% / 6.17%	OVERWEIGHT Sygnus' business model is built on providing capital and direction to the underbanked, targeting the middle market. To accomplish this, the Company has executed several capital raises involving equity, preference shares and debt raise. Sygnus has demonstrated their commitment to growth and being the market leader in the regional private credit space with their acquisition of a Puerto Rico-based, private credit firm, Acrecent Financial in Q3 of their financial year. This acquisition has significantly added to the group's income and overall profitability. The stock trades at significant discount relative to peers both from a P/E perspective and a P/B perspective. At present, given Sygnus' strong current and expected future growth, the market is pricing Sygnus at a steep discount to its book value per share. Sygnus Credit Investments Equity Report
LASM Lasco Manufacturing	P/E: 10.16x P/B: 1.75x Price: \$6.31 Div Yield 2.38%	OVERWEIGHT We expect that the Company's growth trajectory will be sustained, however, in the short term, the financial results have seen an impact from the overall macroeconomic conditions since the pandemic. Margins across the board have been compressed despite record profitability in 2022. Despite continued record tourism arrivals and growth in key sectors such as entertainment, steps need to be taken to restore margin progression. Against this backdrop it is notable that inflationary pressures and supply issues that plagued the company from 2022 to the first quarter of this year will likely begin to ease in the spring of 2023, suggesting a rebound in net profit growth for the company moving forward beyond FY 2023. Plans to further expand its geographical footprint by driving the contribution of export to its revenue will be value-added to the long-term sustainability of the Company's operations Lasco Manufacturing Equity Report

PROVENJMD/ PROVENUSD Proven Group Limited	P/E: 33.57x / 32.5x P/B: 0.76x / 0.67x Price: \$17.07 / \$0.1 Div Yield: 2.95% / 3.05%	OVERWEIGHT Proven has shown a decline in profitability throughout the current financial year, a performance driven by lower share of earnings of associates and higher operating expenses. The company continues to demonstrate its appetite for growth through acquisitions as evidenced by the recent 100% acquisition of Fidelity Bank (Cayman). The company has a history of acquiring companies with accretive value. We expect that profit margins will improve in the future as one-off spending related to recent acquisitions pass.
LUMBER Lumber Depot Limited	P/E: 15.26x P/B: 2.74x Price: \$2.9 Div Yield 2.41%	OVERWEIGHT Lumber represents an option to gain exposure to the construction sector which has been a relatively resilient and fast-growing sector. With this sector tailwind, lumber has shown strong revenue growth since its 2019 listing and the financial year 2022 revenue and net profit are 10.1% and 26.8% higher than financial year 2021 revenue and earnings, respectively. We are still monitoring how the company progresses given the loosening of restrictions and continued growth in the construction sector. We also note that despite the growth it has shown over the last 2 years, the stock still trades at an attractive PE compared to Junior market peers. Lumber Depot Equity Report
TJH TransJamaican Highway Limited	P/E: 8.79x P/B: 4.44x Price: \$3.63 Div Yield 5.25%	OVERWEIGHT The Group continues to experience stronger-than-projected traffic growth, as evidenced by the performance during the third quarter of the 2023 financial year, and this trend is expected to persist at least in the short term. Additionally, the JIO acquisition has improved operating efficiency, and it is expected that as the group continues to reduce debt, profitability and cash flow generation will continue to improve. JBG Jamaica Broilers Group Limited	P/E: 7.58x P/B: 0.96x Price: \$25.25 Div Yield 2.94%	OVERWEIGHT JBG's financial performance has rebounded nicely from the lows seen in FY2020, driven by the recovery in the Jamaican economy and tourist arrivals, coupled with JBG's growing presence in the US market and the increasing production of the Best Dressed Chicken line of products. The loss making Haiti operation has been discontinued which should contribute to improved margins in the coming quarters. Positive results from expansion into the United States and recovery in Jamaican operations, along with stringent cost control have contributed to the surge in profitability in the first half of the 2023 financial year. Jamaica Broilers Group Equity Report
SEP Seprod Limited	P/E: 26.13x P/B: 1.91x Price: \$78.66 Div Yield 2.75%	OVERWEIGHT Seprod saw its financial performance surge for the 2022 financial year, owing to the strategic acquisition of AS Bryden, with revenues and net profit growing by 82% and 93% respectively. Going into the 2023 financial year, we expect easing of supply chain pressures, stability in commodity prices, and further consolidation of profits from AS Bryden to further lift net profits. Along with new products, Seprod also plans to aggressively target growth in export markets and is currently in the process of making necessary investments to increase capacity of its margarine plant. GK GraceKennedy Limited	P/E: 8.22x P/B: 0.74x Price: \$69.89 Div Yield 3.38%	MARKETWEIGHT For the year ended December 31, 2022, GK reported significant top-line growth, however, margin deterioration contributed to a decline in the bottom line. Revenues increased by 10.5% while profits saw a 15.1% decline of flat as operating expenses grew at a faster rate than revenues. The company cited challenges presented by high inflation globally, sustained supply chain issues, increasing interest rates, and foreign currency volatility as issues that have affected profit margins. GK continues to advance its merger & acquisition (M&A) strategy, after it increased its stake in Catherine's Peak Bottling Company Limited in the first quarter of 2023 to move its ownership stake from 35% to 70%, thus granting them a stronger position in the spring water market. The company continues to seek M&A transactions locally and internationally. These acquisitions stand to add more diversity and growth to the company's earnings. GraceKennedy Group Equity Report
MAILPAC Mailpac Group Limited	P/E: 21.55x P/B: 7.35x Price: \$2.37 Div Yield 0%	MARKETWEIGHT During the peak periods of the pandemic, MAILPAC benefited immensely as online shopping became a larger share of shoppers' wallets. In large part, this period of heavy demand driven by pandemic restrictions has passed and while we anticipate online shopping will remain integral for the everyday consumer, the outsized growth we witnessed in FY2020 and FY2021 will not be repeated. Admittedly, the Company has a robust balance sheet with more cash than total liabilities which we believe places MAILPAC in a position to make growth-inducing investments. However, the current slowdown in demand and consequently revenue and profit growth underscores our MARKETWEIGHT recommendation Mailpac Group Equity Report
SGJ Scotia Group Jamaica Limited	P/E: 7.67x P/B: 1.03x Price: \$51.4 Div Yield 3.02%	MARKETWEIGHT The greatest driver of profitability in FY2021 was the reduction of Expected Credit Losses (ECL) relative to the previous year as the economic backdrop improved. Scotia is not likely to have this benefit recur to the magnitude it did in FY2021. The group has made an accelerated effort to digitize its business in line with its digital strategy to drive efficiency and better service customer needs. SGJ is looking to further consolidate its operations and funnel investments in core operations through technology and talent, while also looking to enter new markets and launch new products. Scotia has two major positives. The first is that the current rising interest rate environment supports the Group's bank model, more so than other listed financial institutions. The second is that SGJ is a consistent source of relatively attractive dividends which makes the Company a good asset for investors with a clear preference for income. Scotia Group Equity Report

FTNA Fontana Limited	P/E: 19.54x P/B: 3.64x Price: \$8.99 Div Yield 2.78%	MARKETWEIGHT Fontana has been growing and expanding since listing on the junior exchange in 2019. The Company has plans to expand, which include a new outlet to bring its footprint to a total of seven locations. In its most recent quarter, Net Profit saw a 32.7% increase over the same quarter in the prior financial year. Further, the cost of sales has been impacted given the current inflationary environment and is likely to continue being affected in the near to medium term. However, the company continues to grow organically and is financially positioned to do so. Due to the current environment and increased finance costs, profitability could dampen in the near term but in the long term, the addition of its new outlet could support growth. On balance, the Company has both significant risks and the potential for upside, which underscores our recommendation. Fontana Equity Report
SVL Supreme Ventures Limited	P/E: 36.05x P/B: 9.19x Price: \$19.88 Div Yield 2.92%	MARKETWEIGHT Supreme Ventures is the market leader in the lottery and gaming industry. The company has also in recent years embarked on an aggressive growth strategy through several acquisitions (Champion Gaming and Post To Post Betting). The company would have been impacted by the pandemic as the lockdown measures impacted its operations at Caymanas Park. With the easing of restrictions, the Company should benefit from an easing of lock down restrictions and a normalization of business. Despite this, in the medium term we note that the company now has competition in the lottery segment of the market which may negatively impact margins. The degree to which this might impede the pace of revenue growth will however depend on the take up of new games such as Scratchaz which, at present, seems popular amongst younger consumers as it is a new addition to the Company's product offerings. Supreme Ventures Equity Report
ECL Express Catering Limited	P/E: 10.58x P/B: 2.87x Price: \$2.69 Div Yield 3.61%	MARKETWEIGHT ECL has seen improved performance as the tourism industry rebound, following the pandemic, has been robust. However, the Company is not currently operating at pre-covid efficiency levels, as price increases due to the current global supply chain challenges have driven higher costs across all product categories. While we do expect the tourism industry to continue to recover, driving ECL's revenues to grow and likely surpass pre-covid levels by FY2023/FY2024, the inflationary pressures can not be ignored. Longer-term we do expect the company to reap the benefits of their expanded footprint within the Sangsters International Airport as well as the return to trend growth in stopover arrivals. SOS Stationery & Office Supplies Limited	P/E: 17.44x P/B: 2.17x Price: \$1.57 Div Yield 0%	Stationery and Office Supplies presents investors with another option to benefit from the reopening of the domestic economy. A core segment of their business would have suffered from the lockdown measures and work from home, namely the sale of furniture and its SEEK line of books. However, during that period stationery sales have done well to fill that revenue gap. With the resumption of economic activity, the return to office and the expansion in the BPO sector, SOS might be a large beneficiary in 2022.
SJ Sagikor Group Jamaica Limited	P/E: 12.74x P/B: 1.46x Price: \$39.88 Div Yield 3.44%	Sagikor Group Jamaica Limited would have been adversely impacted by the pandemic even more so than the typical financial sector company due to their exposure to the tourism sector. This would have therefore led to sizeable impairment losses on their investment in associated companies (i.e., Playa Hotel and Resorts). For 2022 we therefore expect to see some amount of recovery as the group has disposed of their investments in Playa which will stem impairment losses while simultaneously still having direct exposure to travel through their US resort (The Hilton DoubleTree) while their banking services should benefit from a pickup in economic activity.

While the credit has seen some spread compression, we believe that there might be more to come. This comes as it trades slightly cheap relative to peers with the major concern as it relates to macroeconomic exposure to Caribbean government debt is likely to be improved with the Ivori transaction. In this regard, the successful closure of the acquisition means that there is potential for more spread compression. IBORROWERS SEE RELIEF AS INTEREST RATES FALL, BUT SAVERS FACE SMALLER RETURNS

Borrowers are beginning to benefit from lower interest rates on new loans as commercial banks and other financial institutions respond to recent policy rate cuts, but depositors are facing reduced returns on their savings and investment products, according to the Bank of Jamaica's monetary policy committee (MPC) and the March 2025 Quarterly Credit Conditions Survey.

INTERNATIONAL DEVELOPMENTS

U.S.

Favorable trade deal news propels stocks to record highs

Stocks posted gains for the week, pushing the S&P 500 Index and Nasdaq Composite to record highs for the second consecutive week. The Dow Jones Industrial Average rose 1.26%, while the S&P MidCap 400 and Russell 2000 indexes both climbed over 0.9%. Value stocks outpaced their growth counterparts throughout most of the week, although the spread was relatively modest by Friday's close.

Stocks were supported by headlines around several new trade deals during the week, including announcements that the U.S. had reached agreements with Japan, Indonesia, and the Philippines. Reports that the U.S. and European Union (EU) are progressing toward a deal ahead of August 1—which President Donald Trump has set as the deadline to impose 30% tariffs on European goods—also appeared to boost sentiment during the week.

The week also brought a slew of corporate earnings reports, including two of the so-called Magnificent Seven stocks, which had mixed responses. Google parent company Alphabet (up 4.38%) reported results on Wednesday that largely beat consensus estimates, while the company's commentary around artificial intelligence (AI) appeared to provide a tailwind for other stocks with AI exposure. Meanwhile, Tesla's report appeared to fall short of consensus expectations, driving the electric vehicle maker's stock lower by 4.12% for the week.

Demand for services drives business activity growth

In a light week of economic data releases, the highlight of the calendar was possibly S&P Global's report of its U.S. flash Purchasing Managers' Index (PMI) data for July. According to the report, U.S. business activity growth accelerated to start the third quarter, with the composite PMI output index jumping 1.7 points to a seven-month high of 54.6 (readings above 50 signal expansion). The expansion was entirely driven by growth in the services sector, with the services PMI rising to 55.2 from 52.9 in June. Meanwhile, the manufacturing PMI dropped from 52.9 in June to 49.5 in July, the lowest reading since December.

Europe

In local currency terms, the pan-European STOXX Europe 600 Index rose 0.54%. Tentative optimism around a possible EU-U.S. trade deal supported sentiment, although the EU said it could retaliate with counter-tariffs in the absence of an agreement. The European Central Bank (ECB) held rates steady, and the comments accompanying its decision were perceived as slightly hawkish, which underpinned the euro's gains against the U.S. dollar. Among Europe's major markets, Italy's FTSE MIB gained 1.03%, France's CAC 40 Index posted a modest gain, and Germany's DAX fell 0.30%. The UK's FTSE 100 Index rose 1.43%.

ECB holds interest rates; eurozone private sector shows resilience

At its July 24 meeting, the ECB kept its key interest rate, the deposit facility rate, unchanged at 2%. The decision to hold the rate steady, after eight cuts since June 2024, had been widely anticipated. Eurozone inflation is currently at the ECB's 2% medium-term target, and the economy is performing in line with or better than expectations, in the central bank's assessment. However, the global environment remains exceptionally uncertain, especially because of trade disputes.

UK economic data continue to soften

In the UK, data released by the Office of National Statistics showed that UK retail sales increased 0.9% month on month (m/m) in June, short of consensus expectations for a 1.2% m/m rise but recovering from a 2.8% m/m fall in May. Retail sales were lower than expected across the board, despite the warm weather in June, which had been expected to boost consumption.

Japan

Japan's stock markets registered strong gains over the week, with both the Nikkei 225 Index and the broader TOPIX Index rising 4.1%. Segments of the market, notably auto original equipment manufacturers, soared on the announcement that Japan and the U.S. had reached a trade deal. The agreement sets a 15% tariff for most Japanese goods exported to the U.S., including autos. The U.S. had threatened to impose a 25% tariff rate, so the outcome was viewed as favorable.
