Stock Ticker	Stock Information (as at March 6th, 2026)	Comments
WISYNCO Wisynco Group Limited	P/E: 16.74x P/B: 2.67x Price: \$21.76 Div Yield 2.12%	OVERWEIGHT Throughout the pandemic, Wisynco has managed to improve its operational efficiency but given the effects of COVID-19 on industries such as tourism and education, the Company was unable to deliver significant revenue growth. Now, with tourism rebounding and schools operating at a greater level, Wisynco has married its improved operational efficiency with stronger revenue growth, allowing for significant net profit growth. As tourism is expected to continue growing towards its pre-pandemic level of output, we expect Wisynco to continue to perform well. Wisynco Equity Report
SGJ Scotia Group Jamaica Limited	P/E: 7.92x P/B: 0.93x Price: \$50.47 Div Yield 3.57%	OVERWEIGHT The greatest driver of profitability in FY2021 was the reduction of Expected Credit Losses (ECL) relative to the previous year as the economic backdrop improved. Scotia is not likely to have this benefit recur to the magnitude it did in FY2021. The group has made an accelerated effort to digitize its business in line with its digital strategy to drive efficiency and better service customer needs. SGJ is looking to further consolidate its operations and funnel investments in core operations through technology and talent, while also looking to enter new markets and launch new products. Scotia has two major positives. The first is that the current rising interest rate environment supports the Group's bank model, more so than other listed financial institutions. The second is that SGJ is a consistent source of relatively attractive dividends which makes the Company a good asset for investors with a clear preference for income. Scotia Group Equity Report
MASSY Massy Holdings Limited	P/E: 8.62x P/B: 0.76x Price: \$74 Div Yield 7.59%	OVERWEIGHT Massy Holdings Limited. (MHL, Massy), through its portfolio companies, engages in trading, manufacturing, distribution, and service industry businesses throughout the Caribbean region. The company operates through three portfolios: Integrated Retail, Gas Products, Motors, and Machine and two business lines: Financial Services, and Strategic and Other Investments. In financial year 2020, Massy transitioned from a Conglomerate to an Investment Holding Company. By so doing, Massy's strategy has changed, with the Group focusing mainly on its core portfolios. These core areas of the business represent Massy's competitive advantages, are well-positioned to scale, and are therefore expected to drive strategic growth going forward. Massy Equity Report

Stock Ticker	Stock Information (as at March 6th, 2026)	Comments
LASD Lasco Distributors	P/E: 10.48x P/B: 1.08x Price: \$3.35 Div Yield 3.67%	OVERWEIGHT Lasco Distributors has continued its growth trajectory, displaying resilience throughout the pandemic, and we expect this to continue post-pandemic supported by the improving economic backdrop of the global economy. As continued domestic demand for goods and services remain strong, the company is also looking to strengthen its exports as well as continue to launch new product lines. However, this isn't without challenges as global supply shocks has affected LASD's gross margins. In response, management has prudently managed operational costs such that higher imported inflationary costs has not completely eroded the bottom line, resulting in continued growth. Lasco Distributors Equity Report
SCIJMD/SCIUSD Sygnus Credit Investments	P/E: 22.01x / 22.19x P/B: 0.54x / 0.54x Price: \$10.9 / \$0.07 Div Yield: 6.45% / 6.4%	OVERWEIGHT Sygnus' business model is built on providing capital and direction to the underbanked, targeting the middle market. To accomplish this, the Company has executed several capital raises involving equity, preference shares and debt raise. Sygnus has demonstrated their commitment to growth and being the market leader in the regional private credit space with their acquisition of a Puerto Rico-based, private credit firm, Acrecent Financial in Q3 of their financial year. This acquisition has significantly added to the group's income and overall profitability. The stock trades at significant discount relative to peers both from a P/E perspective and a P/B perspective. At present, given Sygnus' strong current and expected future growth, the market is pricing Sygnus at a steep discount to its book value per share. Sygnus Credit Investments Equity Report
LASM Lasco Manufacturing	P/E: 10.83x P/B: 1.78x Price: \$6.94 Div Yield 2.74%	OVERWEIGHT We expect that the Company's growth trajectory will be sustained, however, in the short term, the financial results have seen an impact from the overall macroeconomic conditions since the pandemic. Margins across the board have been compressed despite record profitability in 2022. Despite continued record tourism arrivals and growth in key sectors such as entertainment, steps need to be taken to restore margin progression. Against this backdrop it is notable that inflationary pressures and supply issues that plagued the company from 2022 to the first quarter of this year will likely begin to ease in the spring of 2023, suggesting a rebound in net profit growth for the company moving forward beyond FY 2023. Plans to further expand its geographical footprint by driving the contribution of export to its revenue will be value-added to the long-term sustainability of the Company's operations Lasco Manufacturing Equity Report

Stock Ticker	Stock Information (as at March 6th, 2026)	Comments
LUMBER Lumber Depot Limited	P/E: 13.56x P/B: 2.05x Price: \$2.44 Div Yield 2.83%	OVERWEIGHT Lumber represents an option to gain exposure to the construction sector which has been a relatively resilient and fast-growing sector. With this sector tailwind, lumber has shown strong revenue growth since its 2019 listing and the financial year 2022 revenue and net profit are 10.1% and 26.8% higher than financial year 2021 revenue and earnings, respectively. We are still monitoring how the company progresses given the loosening of restrictions and continued growth in the construction sector. We also note that despite the growth it has shown over the last 2 years, the stock still trades at an attractive PE compared to Junior market peers. Lumber Depot Equity Report
TJH TransJamaican Highway Limited	P/E: 15.07x P/B: 6.67x Price: \$6.98 Div Yield 3.66%	OVERWEIGHT The Group continues to experience stronger-than-projected traffic growth, as evidenced by the performance during the third quarter of the 2023 financial year, and this trend is expected to persist at least in the short term. Additionally, the JIO acquisition has improved operating efficiency, and it is expected that as the group continues to reduce debt, profitability and cash flow generation will continue to improve. TJH Equity Report
CCC Caribbean Cement Company Limited	P/E: 14.79x P/B: 2.69x Price: \$102.8 Div Yield 1.98%	OVERWEIGHT Caribbean Cement Company Limited presents a compelling investment opportunity, characterized by financial resilience, dominant market positioning, and exposure to an attractive growth vehicle. The Company's robust liquidity and capital base provide a solid foundation for sustained expansion and consistent dividends to shareholders, while its alignment with the Caribbean's long-term infrastructure and housing priorities supports resilient demand for its products. EQUITIES

Stock Ticker	Stock Information (as at March 6th, 2026)	Comments
GK GraceKennedy Limited	P/E: 10.39x P/B: 0.77x Price: \$72.2 Div Yield 3.29%	MARKETWEIGHT For the year ended December 31, 2022, GK reported significant top-line growth, however, margin deterioration contributed to a decline in the bottom line. Revenues increased by 10.5% while profits saw a 15.1% decline of flat as operating expenses grew at a faster rate than revenues. The company cited challenges presented by high inflation globally, sustained supply chain issues, increasing interest rates, and foreign currency volatility as issues that have affected profit margins. GK continues to advance its merger & acquisition (M&A) strategy, after it increased its stake in Catherine's Peak Bottling Company Limited in the first quarter of 2023 to move its ownership stake from 35% to 70%, thus granting them a stronger position in the spring water market. The company continues to seek M&A transactions locally and internationally. These acquisitions stand to add more diversity and growth to the company's earnings. GraceKennedy Group Equity Report
MAILPAC Mailpac Group Limited	P/E: 23.33x P/B: 8.61x Price: \$2.8 Div Yield 0.96%	MARKETWEIGHT During the peak periods of the pandemic, MAILPAC benefited immensely as online shopping became a larger share of shoppers' wallets. In large part, this period of heavy demand driven by pandemic restrictions has passed and while we anticipate online shopping will remain integral for the everyday consumer, the outsized growth we witnessed in FY2020 and FY2021 will not be repeated. Admittedly, the Company has a robust balance sheet with more cash than total liabilities which we believe places MAILPAC in a position to make growth-inducing investments. However, the current slowdown in demand and consequently revenue and profit growth underscores our MARKETWEIGHT recommendation Mailpac Group Equity Report
FTNA Fontana Limited	P/E: 21.06x P/B: 3.04x Price: \$7.58 Div Yield 3.3%	MARKETWEIGHT Fontana has been growing and expanding since listing on the junior exchange in 2019. The Company has plans to expand, which include a new outlet to bring its footprint to a total of seven locations. In its most recent quarter, Net Profit saw a 32.7% increase over the same quarter in the prior financial year. Further, the cost of sales has been impacted given the current inflationary environment and is likely to continue being affected in the near to medium term. However, the company continues to grow organically and is financially positioned to do so. Due to the current environment and increased finance costs, profitability could dampen in the near term but in the long term, the addition of its new outlet could support growth. On balance, the Company has both significant risks and the potential for upside, which underscores our recommendation. Fontana Equity Report

Stock Ticker	Stock Information (as at March 6th, 2026)	Comments
SVL Supreme Ventures Limited	P/E: 24.43x P/B: 10.18x Price: \$17.12 Div Yield 4.31%	MARKETWEIGHT Supreme Ventures is the market leader in the lottery and gaming industry. The company has also in recent years embarked on an aggressive growth strategy through several acquisitions (Champion Gaming and Post To Post Betting). The company would have been impacted by the pandemic as the lockdown measures impacted its operations at Caymanas Park. With the easing of restrictions, the Company should benefit from an easing of lock down restrictions and a normalization of business. Despite this, in the medium term we note that the company now has competition in the lottery segment of the market which may negatively impact margins. The degree to which this might impede the pace of revenue growth will however depend on the take up of new games such as Scratchaz which, at present, seems popular amongst younger consumers as it is a new addition to the Company's product offerings. Supreme Ventures Equity Report
ECL Express Catering Limited	P/E: 7.19x P/B: 2.12x Price: \$2.31 Div Yield 0%	MARKETWEIGHT ECL has seen improved performance as the tourism industry rebound, following the pandemic, has been robust. However, the Company is not currently operating at pre-covid efficiency levels, as price increases due to the current global supply chain challenges have driven higher costs across all product categories. While we do expect the tourism industry to continue to recover, driving ECL's revenues to grow and likely surpass pre-covid levels by FY2023/FY2024, the inflationary pressures can not be ignored. Longer-term we do expect the company to reap the benefits of their expanded footprint within the Sangsters International Airport as well as the return to trend growth in stopover arrivals. ECL Equity Report

Monitoring List

EQUITIES

Stock Ticker	Stock Information (as at March 6th, 2026)	Comments
SOS Stationery & Office Supplies Limited	P/E: 19.75x P/B: 2.14x Price: \$1.58 Div Yield 1.27%	Stationery and Office Supplies presents investors with another option to benefit from the reopening of the domestic economy. A core segment of their business would have suffered from the lockdown measures and work from home, namely the sale of furniture and its SEEK line of books. However, during that period stationery sales have done well to fill that revenue gap. With the resumption of economic activity, the return to office and the expansion in the BPO sector, SOS might be a large beneficiary in 2022.
SJ Sagikor Group Jamaica Limited	P/E: 9.65x P/B: 1.36x Price: \$40.14 Div Yield 4.14%	Sagikor Group Jamaica Limited would have been adversely impacted by the pandemic even more so than the typical financial sector company due to their exposure to the tourism sector. This would have therefore led to sizeable impairment losses on their investment in associated companies (i.e., Playa Hotel and Resorts). For 2022 we therefore expect to see some amount of recovery as the group has disposed of their investments in Playa which will stem impairment losses while simultaneously still having direct exposure to travel through their US resort (The Hilton DoubleTree) while their banking services should benefit from a pickup in economic activity.
JBG Jamaica Broilers Group Limited	P/E: N/A P/B: 0.62x Price: \$16.4 Div Yield 2.6%	JBG's financial performance has rebounded nicely from the lows seen in FY2020, driven by the recovery in the Jamaican economy and tourist arrivals, coupled with JBG's growing presence in the US market and the increasing production of the Best Dressed Chicken line of products. The loss making Haiti operation has been discontinued which should contribute to improved margins in the coming quarters. Positive results from expansion into the United States and recovery in Jamaican operations, along with stringent cost control have contributed to the surge in profitability in the first half of the 2023 financial year.
JMMBGL JMMB Group Limited	P/E: 5.67x P/B: 0.54x Price: \$17.42 Div Yield 1.72%	Given its relatively low P/E ratio and considering the Group's consistently strong performance throughout the pandemic, the market has been underpricing JMMBGL significantly relative to its local counterparts. JMMBGL's price has declined by 5.8% YTD which provides investors with an opportunity to acquire JMMBGL shares at a more attractive price. The long-term outlook for the company and the stock remains favorable, buoyed by an expanding regional footprint. In July JMMBGL closed on its acquisition of a commercial bank in the Dominican Republic (DR) which now enables the company to offer a full range of financial services in the market. The DR operations currently contributes 17% of net operating revenue and we will be keen to watch the effect of the expansion to JMMBGL's performance over the next few quarters.
SEP Seprod Limited	P/E: 12.64x P/B: 1.43x Price: \$76.71 Div Yield 2.75%	Seprod saw its financial performance surge for the 2022 financial year, owing to the strategic acquisition of AS Bryden, with revenues and net profit growing by 82% and 93% respectively. Going into the 2023 financial year, we expect easing of supply chain pressures, stability in commodity prices, and further consolidation of profits from AS Bryden to further lift net profits. Along with new products, Seprod also plans to aggressively target growth in export markets and is currently in the process of making necessary investments to increase capacity of its margarine plant.

Monitoring List

Fixed Income

Bond & Issuer	Bond Information (as at March 6th, 2026)	Comments
HLT 3.75% 2029 Hilton Domestic Operating	Price (Bid/Ask): \$96.71/ \$96.89 Yield to Maturity (Bid/Ask): 4.89%/4.83% Maturity: May 1st, 2029 Modified Duration: 2.88 Credit Rating: BB+ (S&P)	The Hilton Hotels gives investors access to several global brands in the hospitality and travel sector. As of 2022, Hilton managed, franchised, or owned 7,165 hotels and resorts, totaling 1.1 million rooms in 123 countries. The industry also continues to represent a potential travel recovery play as the demand for business transient (short stay business travel) and group travel continues to gain momentum with trends through 2Q23 continuing to look strong.
SFCCN 5.3% 2028 Sagcor Financial Corporation	Price (Bid/Ask): \$99.71/\$99.98 Yield to Maturity (Bid/Ask): 5.44%/5.30% Maturity: May 13th, 2028 Modified Duration: 2.00 Credit Rating: BBB (S&P) / BB+ (Fitch)	OVERWEIGHT SFCCN 5.3% 2028 gives investors exposure a global life insurer with a growing footprint in the North American Market. While the credit has seen some spread compression, we believe that there might be more to come. This comes as it trades slightly cheap relative to peers with the major concern as it relates to macroeconomic exposure to Caribbean government debt is likely to be improved with the Ivori transaction. In this regard, the successful closure of the acquisition means that there is potential for more spread compression. In addition to this, approaching closer to the end of the Fed hiking cycle might also limit the potential downside tailwinds on price from even more restrictive monetary policy. SFCCN Fixed Income Report
MAT 3.75% 2029 Mattel Inc	Price (Bid/Ask): \$97.62/\$97.71 Yield to Maturity (Bid/Ask): 4.62%/4.57% Maturity: April 1st, 2029 Modified Duration: 2.80 Credit Rating: BBB (S&P) / BBB-(Fitch) / Baa3 (Moody's)	Mattel markets toy products that are sold to its wholesale customers and direct to retail consumers. The Company offers products for children and families, including toys for infants and preschoolers, girls and boys. A rebound in dolls, especially Barbie and Frozen, is the key to Mattel outperforming projections for 2023.

Fitch lifts downgrade warning on NCBJ as hurricane impact deemed manageable

Fitch Ratings removed National Commercial Bank Jamaica Limited (NCBJ) from Rating Watch Negative, saying the economic fallout from Hurricane Melissa is unlikely to materially impair the bank's credit profile.

Carreras heightens call for crackdown on illicit trade as tax on cigarette looms

As the Jamaican Government prepares to implement an increase in the Special Consumption Tax (SCT) on cigarettes, marketing and distribution company Carreras Limited is calling for stronger enforcement measures to combat illicit trade, warning that without tighter controls the higher levy could unintentionally fuel the underground market.

INTERNATIONAL DEVELOPMENTS

U.S.

Major U.S. stock indexes finished the volatile week lower as investors digested escalating conflict in the Middle East in the wake of U.S. and Israeli military strikes on Iran, rising energy-driven inflation risks, and some mixed economic data. Oil prices surged amid concerns about potential supply disruptions and broader geopolitical spillovers. Uncertainty about the conflict's duration and its potential impact on energy markets also drove U.S. Treasury trading, pushing yields higher as investors reassessed inflation risks and the outlook for Federal Reserve policy.

Of the major equity indexes, the S&P MidCap 400 Index performed worst, shedding 4.61%, followed by the Russell 2000 Index, Dow Jones Industrial Average, and S&P 500 Index. The Nasdaq Composite held up best but still declined 1.24%.

ISM data point to continued economic expansion

Data from the Institute for Supply Management (ISM) indicated that U.S. economic activity continued to expand in February. The institute's manufacturing Purchasing Managers' Index (PMI) came in at 52.4 for the month, registering the second straight month of expansion and just the third month over 50 in 40 months (readings above 50 indicate expanding activity). The reading was down modestly from the prior month but ahead of consensus estimates. Employment saw a notable month-over-month improvement, while the prices paid component of the index hit the highest level since June 2022.

The ISM services PMI also surprised to the upside in February, rising 2.3 points to 56.1, ahead of estimates for around 53.9 and the highest reading since July 2022. February was the 20th consecutive month of expansion in the services sector. Strength in new orders, business activity, and employment supported the headline figure, while growth in prices paid persisted but eased somewhat from January.

Europe

After several consecutive weeks of gains, the pan-European STOXX Europe 600 Index tumbled 5.55% in local currency terms over the week. Risk appetite in Europe deteriorated significantly following U.S. and Israeli military strikes on Iran and the subsequent widening of the conflict across the Middle East. Among major stock indexes, Germany's DAX declined 6.70%, Italy's FTSE MIB retreated 6.48%, and France's CAC 40 Index pared 6.84%. The UK's FTSE 100 Index lost 5.74%.

Prospect of higher inflation and lower growth

The military action in the Middle East sent oil and gas prices surging, prompting concerns about the effects that prolonged higher energy prices could have on economic growth and inflation. Data released by Eurostat, the European Union's statistical agency, indicated that even before the Iran conflict, annual inflation in the eurozone hit 1.9% in February, higher than both the 1.7% registered in January and market expectations. Traders' expectations for monetary policy shifted dramatically, with the probability of the European.

Central Bank raising rates increasing to more than 50%.

Unemployment unexpectedly falls across the eurozone
The seasonally adjusted unemployment rate in the eurozone fell to an all-time low of 6.1% in January, a level that was marginally lower than both the previous month and analyst expectations. Youth inflation also declined to 14.8% from 15%.

Japan

Japan's stock markets fell sharply over the week, with the Nikkei 225 Index declining 5.49% and the broader TOPIX Index down 5.63%. Markets were highly volatile amid uncertainty about the duration and scope of the conflict in the Middle East. Investors sought to assess the potential impact of higher crude oil prices on domestic inflation, given Japan's significant reliance on oil and gas from the Gulf region.

Keeping a close eye on the fallout from the Middle East conflict, Bank of Japan (BoJ) Governor Kazuo Ueda said that depending on how the situation unfolds, the impact on the global economy and Japan's economy could be significant.
