Aggressive

Fund Objective

This Portfolio is a USD denominated equity portfolio that enables investors to pool their savings in a common fund with the potential to earn higher rates on investment. It allows investors to take advantage of investment opportunities in a wide variety of instruments that would not normally be available to them as individual investors. The portfolio invests in foreign currency ordinary and preference shares of companies within the Commonwealth, CARICOM, and the United States (US) and may extend to other sovereign governments as prescribed by the Financial Services Commission.

Why Invest in the Fund?

U.S. equities remain resilient as AI-related earnings momentum and moderating July CPI supported risk appetite, with the S&P 500 near record highs. Still, oil above US\$95, concentrated market leadership and elevated bond yields leave valuations sensitive to inflation, labour-market and earnings data. The backdrop continues to favour high-quality companies with durable earnings and strong cash-flow generation. Selectivity remains important as markets balance resilient fundamentals against policy and geopolitical uncertainty. The fund remains focused on fundamentally strong companies through a diversified, actively managed strategy.
